

Cleaner and More Cost Effective Industry in Macedonia

Project funded by the Government of Kingdom of Norway

CALL FOR CONSULTANTS

The project “Cleaner and more cost effective industry in Macedonia” is a 3 year programme offering Macedonian industry technical assistance in identifying environmentally sound energy projects and preparing these projects for financing. The project is funded by the Norwegian Government and is implemented by a consortium consisting of Norsk Energi and NGO Centre for Climate Changes, with support from Macedonian experts in energy efficiency.

We presently require the service of 4 resourceful, motivated and dynamic candidates for the following:

Junior Consultants

Part-time position related to identifying and developing energy efficiency projects for Macedonian industry companies, together with local and Norwegian experts.

The services to be rendered include:

- ✓ Site visit to the company where energy efficiency measures will be developed
- ✓ Active communication with company representative, local and Norwegian experts
- ✓ Active participation in developing pre-feasibility studies for selected energy efficiency measures within set deadlines, together with technical experts, the company representatives and Norwegian experts.
- ✓ Presenting the final pre-feasibility study to financing institutions.

Required Qualifications:

- ✓ Technical background (e.g. mechanical, electrical, technology or metallurgy engineering BSc or MSc).
- ✓ Interest in learning more about project development and desire to contribute to development of climate and energy projects in future.
- ✓ Capacity and resources to assist in the needed time periods (June-December).
- ✓ Good communication skills
- ✓ Excellent spoken and written English and Macedonian.
- ✓ Previous experience in working with energy efficiency is an asset.

Form of Proposal

All interested candidates shall submit the proposal form with the following information:

- Letter of motivation
- CV, including academic qualifications and references

Submission of proposals

Only complete proposals will be taken into consideration. Please submit your proposal to the following e-mail: ann.glimsdal@energi.no and jobs_ccc@yahoo.com not later than **8th of May 2011**.

All documentation/materials provided must be in electronic form and in English
